

PENN® BATTLE® SPINNING REEL

Built to Win the War Between Man and Fish

Sometimes a little skirmish breaks out and the angler simply reels in the fish. But other times, it's an all out war and the winner of the clash is not determined till the very end. The new PENN® Battle® spinning reel gives the angler the advantage, producing catches instead of just hook ups.

The full metal one-piece body and sideplate maintain precise gear alignment under heavy loads. And on the inside are more fishing fighting features like the Techno-balanced™ rotor that provides a smooth retrieve and won't compress under load. Six shielded stainless steel ball bearings plus an anti-reverse bearing add to the performance. The main shaft is stainless steel for added corrosion protection and durability.

Beneath the machined, anodized aluminum spool are HT-100™ drag washers that have a wide adjustment range and stay calm, cool and collected in the heat of battle. No need for a mono backing with the spool, it is equipped with a superline spool band to keep braids from slipping. And to keep a secure grip on the handle, the Battle has an oversized soft touch knob.

Seven models are available, from the 2000 to the 8000. Reel weights range from the 9.6-ounce 2000 to 29.2 on the 8000. Line retrieves range from 29 inches per handle revolution on the 2000 to 41 inches on the 8000 with max drags of 7 to 25 pounds, depending on model.

Large line capacities are available on the Battle spool, from 260 yards of 4-pound test monofilament or 260 yards of 8-pound braid on the 2000 to 390 yards of 20-pound mono or 550 yards of 50-pound braid on the 8000. The MSRP on the PENN Battle is \$99.95 to \$119.95

Frame

One-piece aluminum

Gear Ratio

6.2:1 BTL2000, BTL3000, BTL4000

5.6:1 BTL5000, BTL6000

5.3:1 BTL7000, BTL8000

Weight

9.6 ounces to 29.2 ounces,
depending on model

Bearings

6 SS + 1 IAR

MSRP

\$99.95 to \$119.95

Drag

Oversized HT-100 washers

Line Retrieve

29 inches (BTL2000)

31 inches (BTL3000)

34 inches (BTL4000)

37 inches (BTL5000)

39 inches (BTL6000, BTL7000)

41 inches (BTL8000)

Max Drag

7 to 25 pounds, depending on model
